

Application No. 10/669,341 (CHEN) Amendment A, cont.

Amendment to the Claims:

I-CLAIM:

1. **(currently amended)** A slidable windshield wiper for automobiles comprising:

at least a wiper arm pivoted to a bottom of a windshield ~~of an~~ ~~windshield~~ of an automobile, a wiper blade pivoted mounted to a top of said wiper arm by a rivet, via an articulation rod rotatably connected to the top of said wiper arm having a sloped underside and a plane underside, a blade rubber disposed to inner side of said wiper blade ~~closing to~~ directed toward said windshield;

whereby said articulation rod enables said wiper blade moving up and downward following along along with different tracks.

2. **(currently amended)** A slidable windshield wiper for automobiles comprising:

at least a wiper arm pivoted to a bottom of a windshield of an automobile, a wiper blade having an articulation rod slidably ~~connecting~~ hinged to the top of said wiper arm through a V-shaped elastic member and a blade rubber connecting to inner side of said wiper blade ~~closing to~~ directed toward said windshield;

~~wherein by~~ whereby, said V-shaped elastic member enables said wiper blade to move up and downward following along with different tracks.

3. **(currently amended)** The slidable windshield as recited in claim + 2, wherein said V-shaped elastic member forms ~~as~~ a 50 degree angle

Application No. 10/669,341 (CHEN) Amendment A, cont.

in upper portion relative to a horizontal central line and a 30 degree angle in lower portion relative said horizontal central line thereof.
